## WORK EXPERIENCE:

**Software Engineer II** | Sitetracker
Montclair, NJ, July 2020 - January 2023, Full-Time

· Used Salesforce, Apex, SOQL, and Javascript to implement over 75 unique, custom software solutions for global clients
· Dedicated developer for a multinational telecommunications company during its core product implementation, creating a product used by over 9000 employees in their daily work
* Utilized the Google Geocoding API to map sites and routes in useful and easily-navigated applications for clients
· Responsible for multiple projects simultaneously, using Git and Bitbucket for continuous integration and deployment of features
· Supported market-leading clients in telecommunications, communications infrastructure, renewable energy productions, and EV charging
· Wrote thorough documentation for both end users and future developers
· Promoted from Software Engineer I to Software Engineer II in May 2022

**Quality Assurance Intern** | Numerix
New York, NY, May - August 2018, January - May 2019, Full-Time

· Assessed financial engineering applications to ensure products were ready for production, collaborated with developers to resolve issues
· Participated in daily meetings to provide concise updates and triage cases

**Server Development Intern** | Automated Control Concepts
Neptune, NJ, August - December 2017, Full-Time

· Built servers for industrial-scale use following client guidelines
· Verified correct configurations of servers before deployment to clients
· Assisted with the installation of servers at sites across Southern New Jersey

**Information Technology Intern** | Realty Operations Group
New York, NY, January - May 2017, Full-Time

· Diagnosed and repaired technical issues for both mobile and desktop applications in multiple departments
· Provided superb user service in a fast-paced environment
· Assisted with company-wide phone upgrades, configuring and supplying mobile devices to employees across the company
